

6. Fee deferment

We are happy to negotiate deferment arrangements with our Experts, to help with costs. Ultimately however, the payment terms are between yourself and the Expert allowing you both the ability to build relationships.

7.Regular CPD

We understand that CPD is vital for both expert and solicitor. We are organising regular, local events to provide ongoing education to both parties. We hope these informal events will facilitate our aim to help build and maintain relationships between the expert and the solicitor.

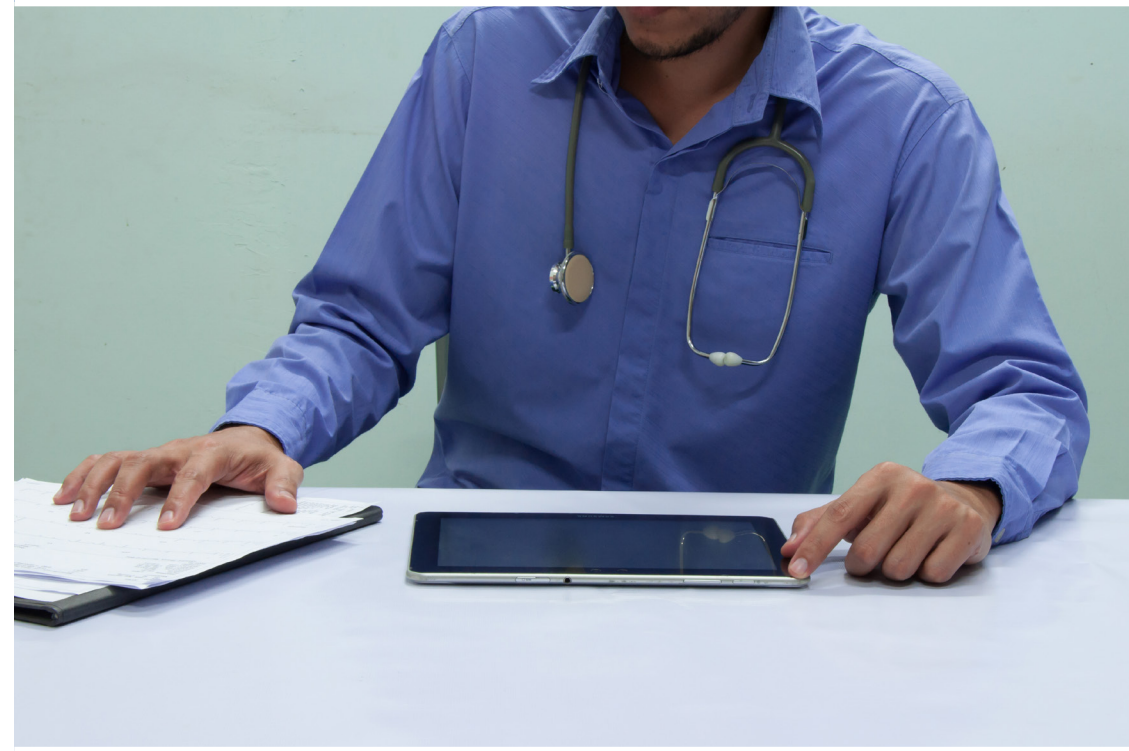

How does it work?

Through our website www.thinkmedicolegal.co.uk secure cases can be accessed online via our management system (OCMS), which allows you to register and set up an account. You can then create electronic cases on the system, request a specific expert, or alternatively the next available appointment. Medical records can then be uploaded safely via our secure OCMS.

Once the Expert has then completed the report, you will receive an automated email, informing you of this. You can then log on and download the report and invoice.

What are the costs to me?

Think Medicolegal is a comprehensive, online managed practice that is funded by the Experts.

Medical Reporting That You Control

What is Think Medicolegal?

We have created **Think Medicolegal** to return control of the medicolegal market back to the Medical Expert and Solicitor. Currently, the organisation of the majority of medical reports in England is undertaken by Insurance companies and agencies who determine the fees and who undertake them. As independent medical experts, we have found it a challenge to engage with solicitors whilst simultaneously building reputations and relationships. **Think Medicolegal** aims to change this. We hope to connect the Expert directly to the Solicitor thereby removing the middleman. Our experience with our sister company Resolve in Scotland has demonstrated that this not only reduces the legal costs, but also provides higher quality reports achieved through a closer working relationship between expert and solicitor.

Think Medicolegal offers a completely different approach to providing expert medical reports across the England. It should not be considered an agency, but an online, secure and transparent facilitator run by doctors for doctors and their referring solicitors.

Background

Launched in 2012, our sister company **Resolve Medicolegal** has revolutionised how medicolegal reports are instructed in Scotland. A single point of contact enables collaborative working between Experts and Solicitors, resulting in secure information transfer and high quality reports. Currently we receive 400-500 requests for medical reports each month across Scotland. These reports are undertaken by our experts who are all recognised NHS Consultants.

How could Think Medicolegal help your company?

1. Reduce costs

Think Medicolegal provides a free service to the solicitor. We are not an agency, and no commission is taken. The fee arrangement for the reports and the T&C's is between your company and the Medical Expert.

Think receives a small % from the Expert for the use of our comprehensive secure online services to allow us to function.

2. Secure data transfer

We have developed a bespoke secure case management system through which you will be able to access live information for each of your cases, which includes uploading documents, making appointments, accessing reports and invoices. The security and confidentiality of client information is of utmost importance to the company. Our current security conforms to the latest internet standards and includes:

- Strong password enforcement
- Personal Identification Numbers (PIN)
- Secure Sockets Layer for data encryption (SSL)
- Database encryption of sensitive information

3. Clinical guidance

It can often be difficult to know exactly which Expert you require for your case. We provide direct access to a team of senior Medical Experts, who can advise you.

4. Transparency.

All our Experts are visible on the **Think Medicolegal** website. Each Experts' CV and T&C's are accessible, once you have registered on our system, which only takes 5 minutes. Thus allowing you to take control and identify the Expert you may wish to instruct based on their experience, expertise and payment terms. Instruction of Experts can be named as above, or un-named if you have no preference and speed of instruction is of the essence.

5. Quality assurance.

Think Medicolegal is run by practicing Experts, with many years of experience. Each new Expert is vetted, trained and their reports assessed on a yearly basis. If you have any concerns regarding your chosen Expert, then **Think Medicolegal** can assist you in resolving any difficulties.
